PROFILE

Final-year Computer Science and Technology undergraduate (GPA 3.80) who has built five full-stack web applications on her own, including an e-commerce store for a client with PayHere card payments. Works across React, Spring Boot, Node.js, Django and PHP with PostgreSQL and MongoDB, with a focus on secure, tested features. Looking for a software engineering or QA internship.

PROJECTS

Amethia

Client project, e-commerce store

Node.js, JavaScript, SQLite, HTML/CSS, PayHere

- Built an online store for a new clothing label with a storefront, shopping bag, checkout and order tracking.
- Integrated PayHere card payments with server-side signature and amount checks; built an admin panel for orders, products and delivery settings.

Campus Lost & Found

University community app

React 19, Vite, PHP 8, PostgreSQL, Leaflet

- Lost and found reports with map pins, private messaging per item with unread badges, and a claim accept/reject flow.
- Email verification, password reset with one-time links, and an admin panel to manage reports and users.

ClassMate LK

Tuition class management system

Java 21, Spring Boot, React, PostgreSQL, Docker

- Attendance, monthly fee tracking and PDF class notes for teachers, students and parents.
- JWT authentication with three roles; layered REST API with Swagger docs, JUnit and Mockito tests, and Docker Compose.

SeatLanka

Bus seat booking app

React, TypeScript, Node.js, Express, MongoDB, Tailwind CSS

- Visual seat map with 5-minute seat holds during payment and QR e-tickets.
- Prevented double booking with a MongoDB partial unique index; JWT roles and Zod request validation.

Tide & Ride

Vehicle rental platform

Python, Django, SQLite, JavaScript

- Beach vehicle rentals with date-based availability search, live pricing, hotel delivery and online cancellation.
- Server-side price calculation, per-user access to bookings, and automated tests for pricing, availability and permissions.

EDUCATION

BSc (Hons) in Computer Science and Technology — 2023 – 2027
Uva Wellassa University of Sri Lanka | GPA 3.80 (Years 1–2)
Final-year research on bioindicators (in progress)

G.C.E. Advanced Level, Physical Science
Chemistry B, Combined Mathematics C, Physics C

SKILLS

Languages
Java, JavaScript, Python, PHP, SQL, HTML, CSS

Frameworks
React, Spring Boot, Node.js, Express, Django, Tailwind CSS

Databases
PostgreSQL, MySQL, MongoDB, SQLite

Testing and QA
JUnit, Mockito, Selenium, Postman, Django test framework

Tools
Git, GitHub, Docker, JIRA, Figma, Linux

Integrations
REST APIs, JWT authentication, PayHere payments, Leaflet maps

STRENGTHS

Builds complete apps end to end

Secure handling of payments and user data

Clear documentation and READMEs

Learns new stacks quickly

LANGUAGES

Sinhala
Native

English
Professional working

REFEREES

Available on request
